OVER SHARING

CYBER DANGER OF SOCIAL MEDIA

You
Tube

**SEEMS
HARMLESS** **however**

By sharing personal information such as your full name, DOB, city you live in and anniversaries you're providing malicious individuals with the information needed to commit fraud.

Using the information, you've innocently publicized on social media, hackers may be able to access personal and/or business accounts. By answering security questions, with information you have provided on social media, you're exposing yourself to be vulnerable which leads to time and financial loss.
